

## CHEAT SHEET v. Jan/2022 by Roman Hruška, Robot ICT

### Automation Cloud

1. Go to **Admin -> Licenses -> Robots & Services**
2. On the bottom of this page, check (edit) **License Allocation to Tenants** (you can check if they are in use in Orchestrator)

### Orchestrator (at desired Tenant)

1. Go to **Tenant -> Machines -> +Add Machine -> +Machine Template**
2. Give new machine template a name and allocate at least 1 license (Production Unattended)
3. After creation, **Copy the Machine Key**

### On the machine (where Unattended Robot will run)

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Download <b>UiPathStudio*.Msi</b> from Automation Cloud homepage.</li> <li>2. Run the installer and choose <b>Unattended robot</b>.</li> <li>3. After installation is complete, open UiPath Assistant.</li> <li>4. Go to <b>Settings -&gt; Orchestrator</b> and enter Orchestrator URL and <b>Machine Key</b>, click <b>Connect</b>.</li> <li>5. Now your status should be: Connected, Unlicensed, that is okay.</li> <li>6. Reboot the machine</li> </ol> | <p>- doesn't matter if Community, Trial or Enterprise</p> |
|--|---|

### Automation Cloud

1. Go to **Admin -> Accounts & Groups -> Robot Accounts -> Create new**
2. Give your new Robot User some name and save.

### Orchestrator (at desired Tenant)

1. Go to **Tenant -> Manage Access -> Assign roles**
2. Click **+Assign roles -> Robot Account**
3. In next screen search for the Robot User you created.
4. Add role: **Robot**
5. In next screen add **Credentials that will be used to login to machine**
6. Optionally, setup Robot Settings, Confirm.
7. Go to **Tenant -> Folders -> Manage Folders**
8. For folder you want, click **Assign Account/Group**
9. Search for your Robot User, set roles: **Robot**
10. Back in the Folder settings: At **Machines** tab, click **Manage Machines in Folder** and add the machine template you created.

## Troubleshooting

Could not start executor. The requested resource is in use.

Could not start executor. A specified logon session does not exist. It may already have been terminated.

**Possible Solutions:** Check RDP Connections; Reboot the machine; Log Off the machine; Search the Forum 😊
